

# AI-Powered Financial assistant

Transforming Business Questions into Real-Time Insights

Powered by **GenAI**, our platform enables business users to ask questions in simple English and retrieve accurate **answers** directly from enterprise databases. Natural language queries are automatically converted into optimized SQL and executed on live data sources. This removes dependency on technical teams while ensuring results remain factual, accurate, secure, and up to date. Business users gain faster, self-service access to insights.

## How It Works

### Ask in English

Type questions in plain English—No SQL needed.

### AI converts to SQL

GenAI translates to optimized SQL queries.

### Get Instant Answers

Queries run directly on live data for immediate results.

## Why Enterprises Choose This

- Reduces dependency on MIS teams
- Delivers real-time, multi-dimensional insights
- Eliminates manual SQL writing
- Chat-like easy interface

- Role-based access
- Queries across MS SQL, MySQL, MongoDB, Documents & Excel
- Scalable Architecture

## Built for Business Teams

### Sales

Check targets and sales by region, hierarchy, product, service line, quarter, or year.

### Finance

Ask about turnover, costs, bad debts, AR/AP by region, product, quarter, or year.

### Operations

Query TAT, quality compliance, throughput, and WIP by week or month.

### Leadership

Explore business performance, profitability, cash flow, and growth trends instantly.

**Democratizing Data Access. Faster Insights. Real Impact.**

Prototype ready | Enterprise Scalable | Secure by Design
